

# Oval

## Modern & sustainable

INTOS has developed a rotatable counter for Amsterdam Airport Schiphol. Developed in close collaboration with all stakeholders involved within the airport. The result is a space-saving modern looking, sustainable and ergonomic check-in counter.

## Space-saving set-up

Besides its unique and ergonomic design, the OVAL offers increased check-in capacity without the need for additional space. The unique swivel function allows ground staff to sit behind the counter in a simple and safe way, without the need for counter space. As a result, the same terminal space can be used more efficiently, with an increase in the number of check-in counters.

# Materials and configurations

The Oval check-in desk that INTOS has developed consists of the following elements:

- ▶ Counter with built-in printer cabinet
- ▶ Skirts for conveyor
- ▶ Conveyor housing
- ▶ Customisation possibilities

The chosen materials and design makes the OVAL a modern looking state-of-the-art check-in desk. The OVAL is durable and easy to maintain due to its ergonomic and space saving arrangement.

Oval check-in counter | Princess Juliana International Airport, St. Martin

Oval check-in counters | Amsterdam Schiphol Airport, The Netherlands
